PROJECTS

ABOUT ME

I'm an open and enthusiastic individual with a deep knowledge in IT and Business.
My approach is a unique blend of technical expertise and psychological insight.
I aim towards attracting new clients and increasing the overall existing customer experience with passion in intuitive designing, leveraging my deep understanding of both technology and human behavior. I specialize in crafting full-stack, cross-platform applications, with a strong focus on Frontend, UI/UX, data visualization and on small details. My approach to design is informed by psychology, ensuring that each interaction is meaningful and impactful.
I thrive in both collaborative and independent work environments, consistently delivering high-quality results under pressure. Lifelong learning is a core value for me, driving my continuous growth and adaptability in the ever-evolving tech landscape.

EXPERIENCE

Intertechnology Group LTD, UK — *Full-Stack Developer*

December 2023 – August 2024

Developed and maintained complete applications, implemented frontend-backend solutions, collaborated with teams, ensured responsiveness, and optimized performance, utilized databases, designed and implemented RESTful APIs, authorization mechanisms, troubleshooted and debugged production issues, source code management.
